

14524

For Prof. Dr. Kerim ALLAHVERDI and the participants of the 16th International Conference on Advanced Laser Technologies (ALT09).

Dear colleagues!

Unfortunately I won't be able to take part in the Conference and deliver the plenary talk.

Laser Technologies today are not only the base of technological development but also the driving force of economic progress of our society.

The program of our conference demonstrates this fact very well and at the same time it shows that Laser Technologies have been developed greatly not only in USA and Russia but also in many other countries that is Turkey, Finland and Korea etc.

I wish you and all the participants of the Conference good luck and to make great success in your work !

Zhores Alferov
